Objective

I am a software engineer in pursuit of growth. I am passionate about software, highly motivated to learn, and eager to take on new challenges.

Relevant Coursework

Object-Oriented Programming
Systems Programming
Algorithms and Data Structures
Comp Organization/Assembly Lang

Experience

Software Developer – Intern
Altec Industries Inc.
May 2022 - Current

Education

Institution: University of Alabama at Birmingham

Address: 1720 University Blvd, Birmingham, AL 35294

Degree: Computer Science
Year: Senior

Overall GPA: 3.68/4.00
Major GPA: 3.90/4.00

Personal Projects

Library Management System
The project aims at providing users (i.e. librarian) with the management of books/inventory. The application offers CRUD functionality for the inventory, as well as user accounts. The backend is a small collection of microservices which communicate with each other to provide the full experience of the system. The frontend is an Angular application.

Banking App
The project is a bank-related API which provides CRUD functionality to clients. It is a simplified version of an ATM, as well as the websites provided by commercial banks like Regions Bank, or Wells Fargo.
